INTRODUCTION

Scope of the Enumeration. The tables presented in following pages are based on an enumeration of employable workers in the urban and rural non-farm areas of Pennsylvania's 67 counties. The territory covered included cities, towns, boroughs and unincorporated communities of 50 or more inhabitants. In general, only persons living on farms or in isolated residences in farming or wooded sections were excluded. Thus the census takes in nearly every occupational group except those commonly associated with agriculture, fishing and forestry.

For convenience in reference, the twenty-four tables selected for publication have been classified in four sections, as follows:

Section I—Employment Status
Section II—Duration of Unemployment
Section III—Occupational Shift; Ages and Occupations
Section IV—Wages

Section I shows the extent of employment and unemployment among all employable workers, with separate breakdowns covering sex, nativity, color, age, last or present occupation and last or present industry.

Section II shows the duration of unemployment reported by unemployed workers both with and without a previous employment history and includes data on the last occupations of persons who were previously employed.

Section III presents information on the extent to which workers had shifted from a former regular occupation to a different last or present occupation. The entire group of employable workers is also classified by age, sex and last or present occupation.

Section IV contains wage data reported by full-time employed workers, with separate tables showing, by counties, the wages of males and females and of native white, native colored and foreign-born workers. Information is also given on wages by sex and age and wages by sex and occupation.

Definitions. The term *employable worker,* as used throughout this census, refers to persons 15 years of age and over who were working for money or its equivalent, or who were seeking work which would yield them money or its equivalent. Included in this class are persons temporarily not at work because of labor disputes. Potential or actual workers who are not included are housewives and other family members customarily working at home for a non-pecuniary reward and persons not seeking work because of temporary illnesses or disabilities which they considered serious enough to necessitate their being inactive for some time.

It is important to note the difference between the above definition of employable workers and the definition of "gainful workers" used in the United States Census.

According to Federal Census usage, gainful workers are persons 10 years of age and over who usually follow a gainful occupation.[1] While this definition is similar to that of employable workers in that it excludes women and children customarily occupied at home with chores or housework, it goes further in that it also excludes the unemployed new worker who can report no usual gainful occupation but only a desire and ability to work. On the other hand, it tends to take in a group of persons, who were purposely excluded from the Pennsylvania census of employable workers: namely, persons who, though they may report a former occupation, have actually removed themselves from the labor market because of temporary disabilities or by choice.

In general, the emphasis in the present enumeration was on the employment status of workers as demonstrated by their actual employment or availability in the labor market, since it was desired to reflect as accurately as possible the extent and nature of unemployment in a period of severe economic dislocation.

The designation *employed full-time* should be interpreted as meaning employed thirty or more

[1] Fifteenth Census Reports on Population, Volume V, General Report on Occupations, p. 3.

hours per week. Persons *employed part-time* were employed fewer than thirty hours per week or were occupied at definitely irregular employment or at odd jobs.

The designation *unemployed seeking work* refers to persons who reported themselves as currently seeking employment[2] which would yield them money or its equivalent. This class also takes in persons who were temporarily not at work because of labor disputes.

The designation *native colored* includes Chinese, Japanese, Filipinos and Mexicans, as well as Negroes.

The Classification of Occupations. With the single exception of Table 7, workers are classified by occupation rather than by industry. Thus a timekeeper in a textile mill is listed in the trade group, "Clerical Occupations," and in the specific group, "Timekeepers," rather than in the trade group, "Textile Trades," which includes such occupations as "Carders," "Knitters," "Spinners," etc. Similarly an unskilled worker on a construction job will be found in the "Unskilled Labor" group and not among workers enumerated as belonging to the "Building and Construction Trades."

In Table 7 all employable workers, including those reporting unskilled, clerical, managerial and technical occupations, are grouped according to industry.

In view of the large number of new workers enumerated, it was necessary to adopt an arbitrary rule for determining their occupational classifications. According to this rule, the new worker, if employed, was listed as having the occupation at which he was working at the time of the census. If unemployed and not previously employed, he was listed as having the occupation for which he was best fitted by training and aptitude—in other words, the occupation for which his services were available in the labor market. For example, if a graduate chemist had found temporary employment as a salesman in a shoe store he was enumerated as an employed shoe salesman, but if he was still totally unemployed he was counted as an unemployed chemist.

[2] There were, of course, numerous instances in which housewives and others who would not normally have attempted to become wage-earners reported themselves as "seeking work" solely because other potential workers in the family were unemployed. Such persons were not considered unemployed in the usual sense of the word and, accordingly, were excluded from tabulations.

Extent of Occupational Shift. Although the census schedule differentiated between "temporary" and "regular" occupations, it will be noted that the last or present occupation is the one given in all tables except Table 11.

Table 11, showing the distribution of the entire group of employable workers according to regular occupation and last or present occupation, indicates the extent of the occupational shifts brought to light in the census. While this table provides suggestive evidence of the effect of depression conditions and particularly of the tendency for workers to be forced from skilled and semi-skilled pursuits into those of a less specialized nature, it must be recognized that the data are subject to definite limitations arising from inevitable variations in the framing of questions by enumerators and in the interpretation of the answers given.

Wage Information. The collection of wage information was accompanied by the usual difficulties in the way of accuracy although wide publicity was given the fact that enumerators signed pledges to reveal no confidential data. The following tendencies should be considered in evaluating Tables 15 to 24 covering wages:

(a) Persons remunerated on an hourly or piece work basis may have reported a weekly income which, while accurate for a given week, was either above or below their average or usual earnings.

(b) Persons paid partly in cash and partly in board and/or lodging (e. g., household servants) may have specified only the cash part of their incomes in stating weekly compensation.

(c) Recognition of "human nature" makes reasonable the assumption that persons at various income levels may have tended in some instances to understate or overstate their earnings, although such under- and over-statements probably tend, in the aggregate, to cancel each other.

In making use of State totals, it should be noted that the wages of full-time workers in Allegheny County and in Lancaster City (Lancaster County), McDonald Borough (Washington County), and Trafford Borough (Westmoreland County) were tabulated as "Unknown" since wage information was not gathered in these subdivisions.

[1] Since only selected occupations for female workers are listed in Table 24 the figures in this column for the individual occupations do not necessarily represent the comblination of Tables 23 and 24. The grand total, group totals, and sub-totals, however, are direct combinations.

[2] The occupations reported for unemployed workers not previously employed are those for which these workers considered themselves fitted by training or aptitude. They may, therefore, be viewed as definitely in the labor market for the occupations specified. It will be noted that 91,011 (approximately 43 per cent) of the total group reported no specific occupation.

[3] n.e.c.—not elsewhere classified.

[4] Includes bankers, brokers, importers, exporters, shippers, and wholesale and retail dealers.

[1] Owing to the inclusion of employable workers of unspecified nativity, figures in this table do not equal the sum of those in Tables 18, 19, and 20.

[2] Wages are shown to the nearest dollar only. "Under $3" refers to amounts up to but not including $2.50. Similarly, "$3–7" refers to amounts from $2.50 up to but not including $7.50, etc.

[3] Wages of full-time workers in Allegheny County and in the City of Lancaster (Lancaster County), McDonald Borough (Washington County), and Trafford Borough (Westmoreland County) are included under "Unknown" since wage information was not gathered in these subdivisions.

[1] The only occupations listed are those for which there was a sizable number of female workers. The occupations showing a small number of workers are grouped, in their respective occupational groups, in the "Other" classification.

[2] Wages are shown to the nearest dollar only. "Under $3" refers to amounts up to but not including $2.50. Similarly, "$3-7" refers to amounts from $2.50 up to but not including $7.50, etc.

[3] Since there were no occupations having 100 or more, or 25 per cent or more, of their full-time workers earning $53 or over per week no extension table is shown.

[4] Wages of full-time workers in Allegheny County and in the City of Lancaster (Lancaster County), McDonald Borough (Washington County), and Trafford Borough (Westmoreland County) are included under "Unknown" since wage information was not gathered in these subdivisions.

[5] n.e.c.—not elsewhere classified.

[6] Includes bankers, brokers, importers, exporters, shippers, and wholesale and retail dealers.
